

Creating the future  
with reliable technology

We provide high-quality technical services with expertise in numerical analysis, system construction, and data analysis in social infrastructure, disaster prevention, environment, and science fields.

## Technical Services

### Numerical Analysis Technology Service

Hydraulic analysis, sediment analysis, water quality analysis, sewage analysis, hydrological cycle analysis, runoff analysis, ground water analysis, earthquake resistance analysis, structural analysis, and ground analysis

### Information Technology Service

System development of infrastructure, disaster prevention, environment, and business operation improvement, and construction of various IT solutions

### Spatial Data Processing Service

Analysis and process of hydrological, topographical and meteorological data

### Comprehensive Data Prevention Service

Numerical analysis relating to disaster prevention, and development of planning map, hazard map, and disaster prevention systems

### Science Technology Service

Artificial intelligence, optimization and acceleration of program processing, big data processing/analysis, and technology development support
